

What are the challenges and opportunities in introducing new technologies to the market for modern healthcare?

Prof. Liam M Grover, FMedSci Director of the WMHTIA and the HTI

Healthcare Technologies Institute (HTI) University of Birmingham, @DWLiam

UNIVERSITY^{OF} BIRMINGHAM

- An academic (>200 papers) but always maintained a focus on translation
- >30 patent filings
- Four products concept

 patient
- Now helping others with that journey

Birmingham, UK

What most people probably know Birmingham for.....

The home of the Peaky Blinders

Birmingham is a hugely ethnically diverse city

A sector with growing importance

- UK market valued at £17bn and set to grow to £21bn
- World market currently estimated to be £420bn
- Demand for new medical technologies is unprecedented and continued delivery of national healthcare is dependent on the deployment of new and more efficient processes
- So what is stopping us.....

Translation of medical technologies.....

.....failure to launch!

UNIVERSITY OF BIRMINGHAM

One of the major challenges in this sector is diversity

Increasing risk leads to enhanced regulation and cost

What is claimed and how it is used are critical

Class I

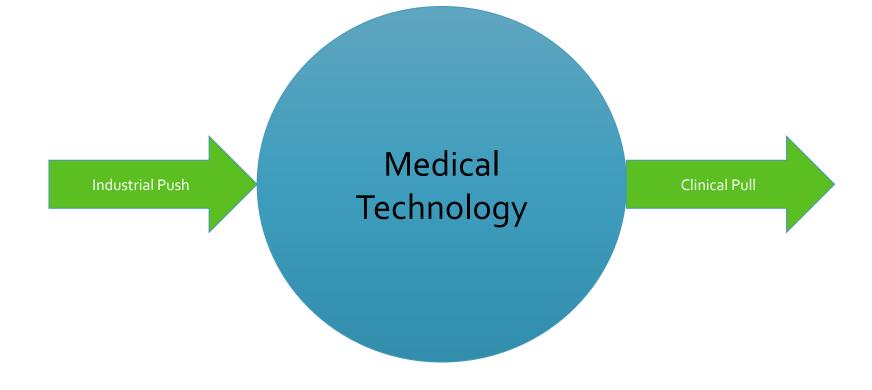

Class II

Class III

Costs of development

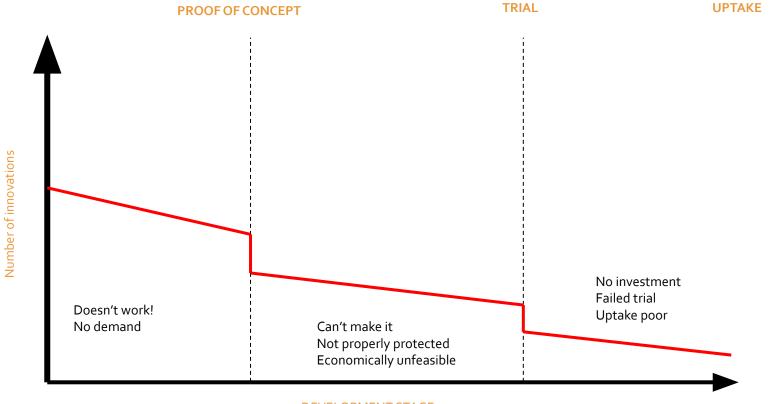

Establishing the usefulness of a technology

But is this always enough?

There is a high rate of attrition in the med tech sector

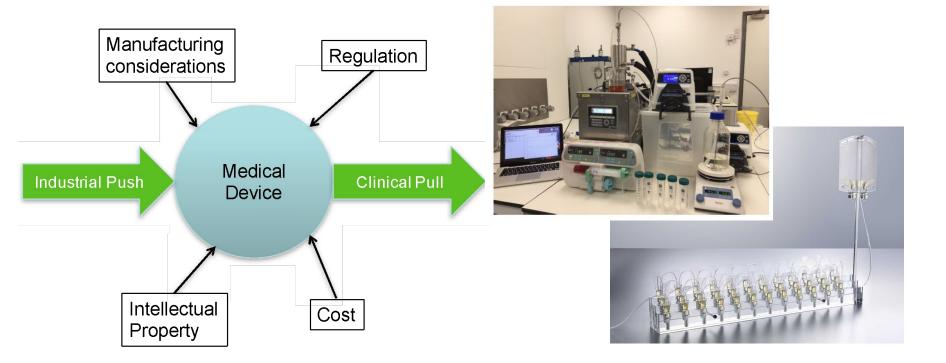

DEVELOPMENT STAGE

What are we doing about this?

Helping innovators to plan their route sooner

The Innovation Accelerator Program

 $\underline{\text{Home}} > \underline{\text{News}} > \texttt{\pounds100m} \text{ R\&D} \text{ levelling up funding awarded to accelerate innovation}$

£100m R&D levelling up funding awarded to accelerate innovation

Cumhtia

17 March 2023

The Innovation Accelerators programme is investing £100 million in 26 projects to accelerate the growth of three high-potential innovation clusters.

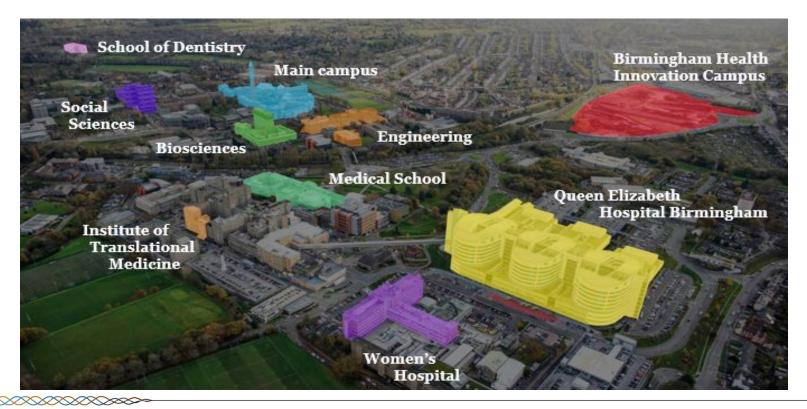

Targeting support at pinch-points in development

DEVELOPMENT STAGE

Strategic investment in healthcare sector based around UoB campus

Precision Healthcare Technology Accelerator (PHTA)

- New development close to campus/hospital
- To house clinical infrastructure
- Colocation with companies engaged in the sector
- Will provide supportive environment for growth

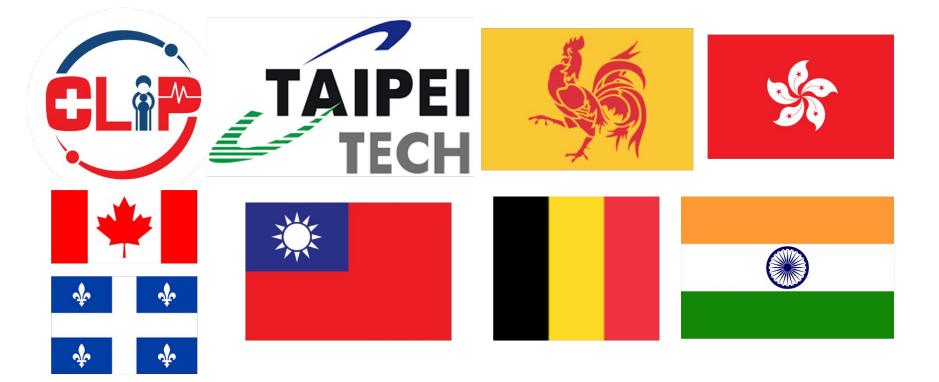

What the West Midlands can offer

- Patient population diverse and serving a population the size of Scotland
- Proximity to top ten universities within the UK (Birmingham, Warwick)
- Comparatively low living costs
- A city with the highest level of external investment outside London
- (proximity to London 1h 12min by train far lower overheads)

UNIVERSITY OF BIRMINGHAM

Med tech is a global market

UNIVERSITY^{OF} BIRMINGHAM

We are creating an international network of incubators

WMHTIA International Assembly, Conference, Exhibition and Brokerage Event

3 December 2024, National Exhibition Centre (NEC), Birmingham, UK

- Meet industry experts and learn about the latest technology and market trends in healthcare
- Connect with leading-edge innovators and world-class research teams in the UK
- Access knowledge of the UK healthcare market and get support to establish your business in one of the country's most prominent regions in health tech and life sciences
- Identify collaborators for EUREKA and Horizon Europe-related project development
- Extend your networks globally at a truly international event attracting a range of innovators from across Europe and beyond

Exclusive offer:

- FREE access to conference, exhibition and international brokerage event supported by the Enterprise Europe Network
- FREE exhibition space offered to international visitors (subject to availability)
- FREE organised visit on 4 December to Birmingham Health Innovation Campus (BHIC), Medical Devices Testing and Evaluation

Centre (MD-TEC) and Institute of Translational Medicine (ITM) followed by a networking lunch

Thank you!!!

Please feel free to reach out if you would like to discuss the development of any of your technologies.....
